CORA FLUSH BOX S6

Reference	EAN
7703	8424299077031

Description.

Description

- To install a plate, it is necessary to place a box on the wall where the plate will be fixed later.
- The flush-mounted boxes are made of aluminium profiles with a zamak upper and lower end (stop). These 2 zamak pieces (upper and lower) for fixing the Cora Plate allow the flush-mounted box to be corrected by up to 10 mm in relation to the wall.
- The box has circular marks cut into the bottom of the box, which are pierced with a light blow or pressure, thus allowing the cables to pass through.
- In the event that several panels are combined, always from the same series, it is necessary to use a set of spacers (ref. 8829) for a perfect coupling. One set is required for each additional panel installed between the flush-mounted boxes.
